Want more from your windows?

Ask for ENERGY STAR.

Westfall Vinyl offers a variety of colors, options and styles

Colors – All windows are available in Oak, Light Oak, Sandstone, Beige, and White.

Screens – You can choose either our popular half screen or full size screen. We use only the best materials in our screens, the fabric is made of a durable, long-lasting fiberglass for long life.

Glass – With our wide selection of glazing options, the exact window you need is available. We offer energy efficient Low E Glass, Argon gas-filled windows, triple glazing and tinting. Specify obscure glass for bathrooms or other locations requiring privacy.

Grids – Between-the glass grids allow you to match any decor while also offering the cleaning ease of a single piece of glass. They are available in colonial diamond pattern and each is offered in three colors to help you attain the look you want.

Security – Our windows come with pop-out, retractable locks. They limit sash travel to provide ventilation while maintaining child safety and discouraging break-ins.

Specialty – Install a combination window when you want a larger than normal window. Our factory-mulled specialty units include twins, triples, and circle tops.

New Construction – Select a conventional flat nailing flange or use our J-Channel flange for applications which will be vinyl sided.

Want more from your windows?

Ask for ENERGY STAR.

ENERGY STAR–qualified windows, doors, and skylights save you energy and money, increase the comfort of your home, and protect your valuable possessions from sun damage.

... Save money and energy. Installing ENERGY STAR qualified windows lowers energy bills and saves you money over single-paned and even new double-paned, clear-glass windows.

... More than just dollar savings. ENERGY STAR–qualified windows protect from the winter heat and summer sun, while also reducing condensation and interior fading.

... What makes a window, door, or skylight energy-efficient? Thanks

to a host of new technologies, ENERGY STAR–qualified windows, doors, and skylights keep your home cooler in the summer and warmer in the winter, making you more comfortable.

... Purchasing tips to help you buy with confidence. Every ENERGY STAR–qualified window, door, and skylight is independently certified to perform at levels that meet or exceed strict energy efficiency guidelines set by the U.S. Department of Energy.

... Energy-saving tips. Proper installation, orientation, tree planting, and home sealing can help you save even more energy and money!

5 Step Purchasing Tips

1. Determine your ENERGY STAR Climate Zone

2. Look for the ENERGY STAR label
When shopping for windows, doors and skylights, look for the ENERGY STAR label to determine if the product is qualified in your area.

3. Ask for ENERGY STAR when ordering
All ENERGY STAR window, door, and skylight manufacturer partners offer products that meet the ENERGY STAR criteria.

4. Have Windows Properly Installed
To get the most out of your windows, doors, and skylights, have them installed by trained professionals.

5. Save your receipt and ENERGY STAR labels as documentation for the federal tax credit.

Windows should display an official ENERGY STAR label or equivalent custom label, next to the NFRC label. There are a variety of custom labels, but all should include the same elements as the official label:

... The ENERGY STAR Certification Mark

... A map showing where the product is qualified

... A qualification statement
